

Cleco's new **Torque Analyzer** is easy to operate for quickly and accurately verifying your CellClutch™ nutrunner torque setting.

FAST - Built-in torque transducer for fast and accurate torque readout on the easy-to-read white OLED screen

FLEXIBLE - Powered by either power cord or battery for flexibility

VERSATILE - Rundown adaptor provided to simulate real-world tightening. Can be used to verify torque on all Cleco tightening products.*

* Does not support Impact tools
